

USGS Streamflow data for site 02085000

Summary

This dataset was prepared for Environmental Data Analytics (ENV 700) at Duke University

The dataset contains streamflow data from the USGS streamflow gage site 02085000 (Eno River at Hillsborough, NC).

Database Information

Data were collected from the U.S. Geological Survey's Water Services website. More information can be found here: <https://waterservices.usgs.gov/>

NOTE: This site will be decommissioned in early 2027. Access to and format of the data will change at that time, with future access done via the `dataRetrieval` package.

The `dataRetrieval` code to extract these will be:

```
outputData <- readNWISdata(sites = "02085000",
  startDT = "1928-01-01",
  endDT = "2025-12-31",
  siteStatus = "all",
  service="dv")
```

Data were collected using the Daily Values Service on the USGS Water Services website [link](#).

From the Daily Values homepage, the following selections were made:

- Select Service to Test: `Daily Values Service`
- Select a Major Filter: Site or Sites = `02085000`
- Output format: `USGS RDB (tab-delimited) format`
- Date Ranges
 - Range Values: `Return all values within an absolute date range (start and end dates)`
 - Start Date: `01/01/1928`
 - End Date:

The generated URL is:

<https://waterservices.usgs.gov/nwis/dv/?format=rdb&sites=02085000&startDT=1928-01-01&siteStatus=all>

CSV file was saved as `USGS_Site02085000_Flow_Raw.csv`.

Data were accessed 2026-06-11.

Data Content Information

Gathered from waterdata.usgs.gov:

----- WARNING -----

Some of the data that you have obtained from this U.S. Geological Survey database may not have received Director's approval. Any such data values are qualified as provisional and are subject to revision. Provisional data are released on the condition that neither the USGS nor the United States Government may be held liable for any damages resulting from its use. Go to <http://help.waterdata.usgs.gov/policies/provisional-data-statement> for more information.

Data for the following 1 site(s) are contained in this file

USGS 02085000 ENO RIVER AT HILLSBOROUGH, NC

TS_ID - An internal number representing a time series.

IV_TS_ID - An internal number representing the Instantaneous Value time series from which the daily statistic is calculated.

Data provided for site 02085000

TS_ID	Parameter	Statistic	IV_TS_ID	Description
165986	00060	00001	89054	Discharge, cubic feet per second (Maximum)
165987	00060	00002	89054	Discharge, cubic feet per second (Minimum)
84936	00060	00003	89054	Discharge, cubic feet per second (Mean)
84937	00065	00001	89055	Gage height, feet (Maximum)
84938	00065	00002	89055	Gage height, feet (Minimum)
84939	00065	00003	89055	Gage height, feet (Mean)

Data-value qualification codes included in this output:

A Approved for publication -- Processing and review completed.

e Value has been estimated.

P Provisional data subject to revision.
